## SUMMARY

Frontend developer specializing in the React ecosystem (Next.js, TypeScript). I build high-performance SPAs and SSR applications with modern UI/UX, focusing on smooth animations and pixel-perfect layouts. I excel at solving complex technical challenges, from hydration bugs to advanced filtering logic and turning them into reliable, maintainable code. I am currently seeking a remote position within a product team to apply my skills, deliver business value, and continue my professional growth.

---

## TECHNICAL SKILLS

- Core: JavaScript (ES6+), TypeScript, HTML5, CSS3
- Frontend: React 19, Next.js 16
- State & Data Management: Zustand, React Hook Form, Zod
- Backend & Database: Node.js, SQLite, Prisma ORM, NextAuth
- Styling & UI: Tailwind CSS v4, shadcn/ui, Framer Motion
- AI & Tools: Gemini API, Generative UI, Figma, Git, Vercel
- Languages: Russian (Native), English (B1/B2 - fluent in reading technical documentation).

---

## KEY PROJECTS

### Interactive Portfolio | *Next.js 16, React 19, TypeScript, Tailwind CSS, Framer Motion*

- Developed a high-performance interactive portfolio using modern SSR/SSG patterns. Implemented complex animations and micro-interactions via Framer Motion to deliver a premium UI/UX experience.

### Freelance Income CRM | *Next.js 16, TypeScript, Tailwind CSS, Framer Motion, Prisma ORM, SQLite, shadcn/ui*

- Engineered a full-stack SaaS solution for income tracking. Implemented Role-Based Access Control (RBAC), JWT authentication, automated tax calculations, and dynamic revenue charting.

### Million Cars (Auto Marketplace) | *Next.js 16, Node.js, Playwright, Tailwind CSS v4, Resend API*

- Developed an automated Node.js/Playwright web scraper, successfully bypassing WAF restrictions by targeting the mobile DOM to extract real-time vehicle data. Built a high-performance SSG landing page featuring a secure, server-side contact form integrated with the Resend API via Next.js Server Actions.

### Lite-Shop E-Commerce | *Next.js 16, TypeScript, Tailwind CSS, Zustand*

- Architected a modern e-commerce prototype focusing on advanced cart logic (dynamic quantity updates, tax calculation, total price reduction). Utilized Zustand for global state management and implemented client-side search filtering with custom debouncing to ensure optimal rendering performance.

---

## ACHIEVEMENTS & EXPERTISE

- AI & Big Data Expert-Mentor (2025): Consulted and evaluated participants at a specialized IT championship. I gained a deep understanding of neural networks and applied AI, which I actively leverage in AI-driven development.
- Regional IT Championship Winner (2024): 1st place in the "High Technologies Championship". Demonstrated the ability to work under strict deadlines, write complex interactive logic, and optimize rendering performance.

---

## WORK EXPERIENCE

- Frontend Developer (Freelance / Private Practice)
- *September 2024 – Present*
- Full-cycle web application development: from architectural design to deployment on Vercel/Netlify.
- Released 4+ production-ready projects for clients and personal portfolio.
- Integrated REST APIs, managed asynchronous data flows, and created responsive UIs using Tailwind CSS.

*Note:* Previous experience in retail sales and corporate IT monitoring (2023–2025, MegaFon Retail, Rosseti) provided strong skills in client communication, conflict resolution, and analytical problem-solving in high-stress environments.

---

## EDUCATION

### Vologda College of Communications and Information Technologies

Degree: Software Engineer (Information Systems and Programming) Graduation Year: 2025.
